PHYLEX
BY PHOENIX STRATOS SECURA

PRODUCT OVERVIEW

Phylex Scan

Automated, scheduled, provable security testing for your web apps — straight from the browser.

WHY IT MATTERS

Web-app flaws, TLS certificates and email configuration are among the most common ways in for attackers. Phylex Scan checks them with nothing to install, explains findings in plain language, and keeps proof of every fix for your audits.

HOW IT WORKS

1 Verify your asset
Prove domain ownership with a DNS TXT record or a file. Only assets you own can be tested.

2 Scan
On demand or scheduled. Scanners run in the Phylex cloud, Jakarta region.

3 Report & fix
Findings by severity, remediation steps, triage, and automatic retests.

WHAT WE CHECK

- Common web vulnerabilities (OWASP Top 10) with OWASP ZAP & Nuclei
- TLS configuration & certificates (testssl.sh)
- Domain email security: SPF, DKIM, DMARC, CAA
- Open ports & exposed services
- Subdomain discovery from passive sources
- Actively exploited CVE intel (CISA KEV) matched to your stack

BUILT FOR AUDITS

- Findings mapped to CWE, OWASP Top 10 and ISO/IEC 27001:2022 controls
- Data and scan results stored in Google Cloud, Jakarta region
- Asset ownership re-checked before every scan (Scope Guard)
- Every report download and action is audit-logged

PLANS

	Trial	Starter	Pro	Business
Term / billing	7 days	Monthly	**Monthly**	Monthly
Assets (web/API)	1*	4	**10**	30
Manual scans	2 total	4 / mo	**20 / mo**	100 / mo
Scheduled scans	—	Weekly	**Weekly**	Daily
TLS & email security	•	•	•	•
Subdomain discovery	—	•	•	•
Active scan & ports	—	—	•	•
CVE intel & threat scans	—	—	•	Automatic
Authenticated scans	—	—	**Soon**	Soon
Reports	Watermarked PDF	PDF·CSV·MD·JSON	**PDF·CSV·MD·JSON**	PDF·CSV·MD·JSON
Ticket response	72 h	48 h	**24 h**	8 h

*Trial: 1 asset on your company email domain; full detail for Critical & High findings. Prices exclude VAT — contact us or see the app.
